

Data is a powerful tool – but only if it's actionable for your practice

InfoDive® gives you instant access to accurate, insightful, and actionable information about how your practice is performing. This web-based business intelligence solution allows you to quickly and easily turn disparate datasets into insights for the optimal business performance of your practice. Robust benchmarking allows comparison of practice and provider performance to peers around the country. Data and trends can be utilized to support practice change and growth.

Key insights

- Monitor performance using over **200 specialty-specific benchmarks**
- Measure provider production with accurate work **Relative Value Units (wRVUs)** assigned using Medicare rules
- Optimize **revenue cycle processes** and conduct payer audits
- Evaluate **net cost recovery** using paid claims, invoice cost and rebates for Buy and Bill products
- Track shifts in utilization and net cost recovery resulting from **use of biosimilars**
- Quickly spot **inaccurate or missed drug billing** using the GapFinder®
- **Robust profiling** of new patients, referrals and patient demographics to target marketing efforts
- Analytics to support shifts from fee-for-service to **alternative payment programs** including bundles/case rates, CMMI programs, and emerging value-based care models

Features

- Minimal staff time required for data acquisition and implementation
- Works with most Practice Management (PM) systems
- Historical data maintained allowing three-year trends
- Integrates multiple PM systems for practices switching billing platforms
- Consolidates and normalizes data from multiple practices or divisions for enterprise views
- Monthly updated benchmarks
- Complimentary monthly educational webinars
- On-line tutorials and unlimited support and training
- Key report packets delivered monthly
- Easy to use – no software to install
- Data secured with HIPAA compliant software and hardware
